

# The Knight

I am the Knight.  
Knights are the only pieces  
on the chessboard that can  
jump over other pieces.  
I am worth 3 points.

There are 2 of us in each army.  
Set us up in the back files next to the Rooks.  
Put the White Knights in the 1st rank.  
Put the Black Knights in the 8th rank.

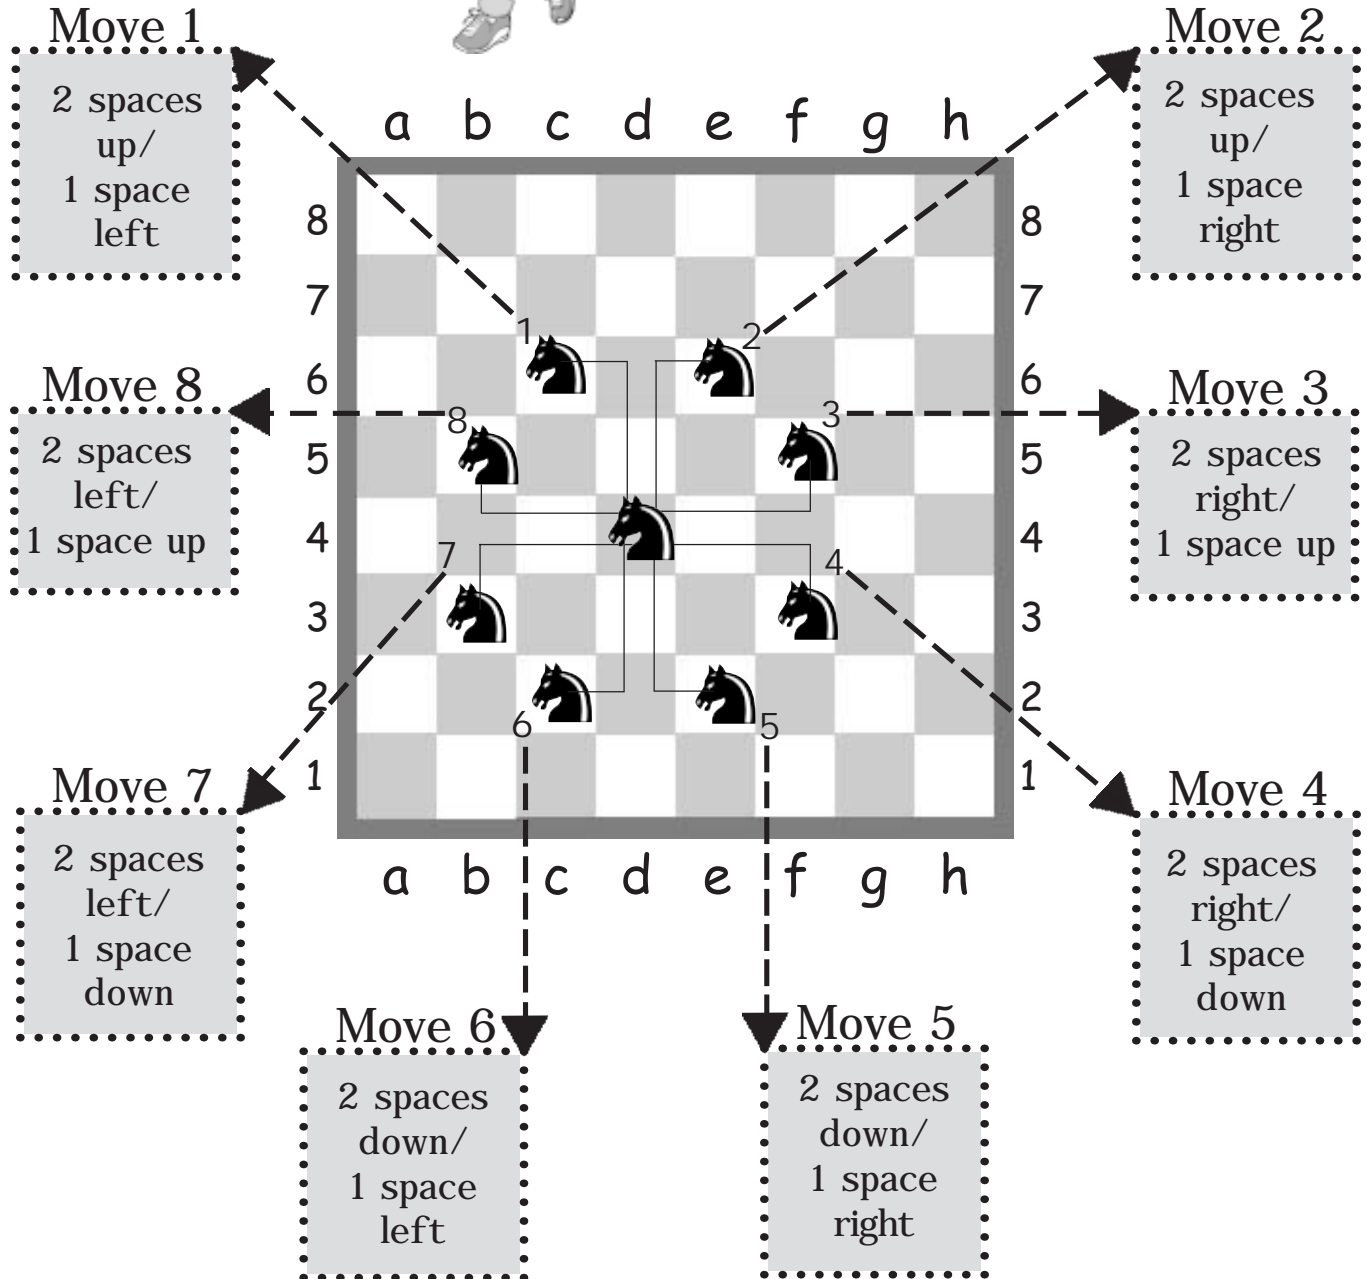

# Moving the Knight

The Black Knight at d4 can move to 8 different squares on the chessboard.

Knights always move in the shape of the letter L. They can move 2 spaces horizontally and 1 space vertically. Or, they can move 2 spaces vertically and 1 space horizontally!

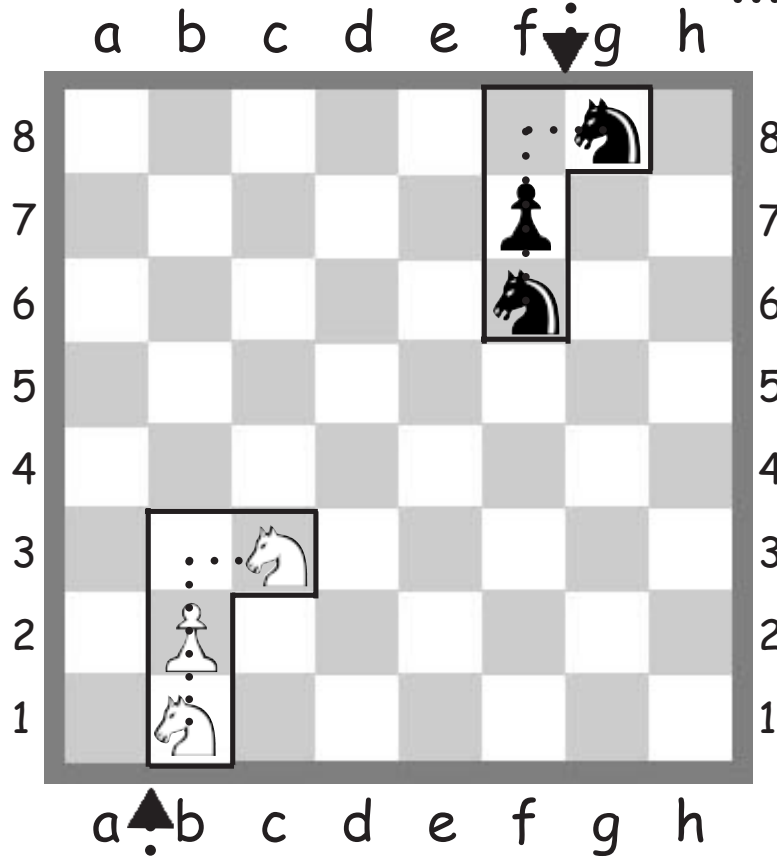

# Jumping the Knight

Knights always land on the opposite color square from where they started.

When the Black Knight moves from g8 to f6, he must jump over the Black Pawn at f7.

When the White Knight at b1 wants to move to c3, he must jump over the White Pawn at b2.

Think About It

Knights are the only pieces that can jump over other pieces.
